## Let It Roll Off

Use your key today  
I'm out the door  
I'll tell your friends it's my fault  
Won't be hard to  
Find my missing treasures  
Just found some pride that's left to decide  
No lonely nights and  
Hey I'm sorries  
Why'd you wait up  
Where's my conscience

I'd take your side just one more time  
To get me to tomorrow  
Don't read my face  
Blind to my  
Mask your pain  
Don't change my mind  
You never hear me say I'm sorry  
You won't believe I'm broken hearted

Let it roll off  
Or shake it off  
I was never very tough  
But I was young  
And you had angel eyes  
And I didn't want advice  
And when you smiled I could push it all behind until the  
next time  
But this time  
I can't look into your eyes

I'll walk away  
No more painful nights and sorries  
Sleeping for a calm tomorrow  
Don't tell me  
Shame on you you had it all  
We were meant to fall  
Your love was too good to be true

Let it roll off  
Or shake it off  
I was never very tough  
But I was young and you had angel eyes  
And I didn't want advice  
And when you smiled I could push it all behind until the  
next time  
But this time  
I can't look into your eyes

Let it roll off  
I'm taking off  
Know when I've had enough  
Miss you sometimes loneliness is blind  
Lonely never has a fight

Let it roll off  
Or shake it off  
I was never very tough  
But I was young and you had angel eyes  
And I didn't want advice  
And when you smiled I could push it all behind  
Until the next time  
Until this time  
Until this time
