

Aurouze

No Problem

Where to go what's next
You took me by surprise
Time passes by before you know it
One day at a time
On my own
I'd undo the times I didn't look through your eyes
You saw stars and I saw blinking yellow lights

Where're the times when you would call me in the night
Don't apologize I wake happy
You need me at your side
You're no problem
Never not a moment 'til I had to watch you go
Did I tell you all the time
You should be happy
There's no excuse when you're young enough to fly

Good bye
And when you hit the road if I cross your mind
I hope you have some time before you see we're two of a
kind
There may be times you think you need advice
Baby so did I
You'll find your way your own way
I was only acting wise
But if you're lost or scared call me anytime
Don't apologize
I'll wake gladly
I'll be at your side

You're no problem
Never not a moment 'til I had to watch you go
Did I tell you all the time
You should be happy
There's no excuse when you're young enough to fly
And who'd dare hurt you when I've watched you day and
night should realize
I taught you
Just fly
